Jason,

I'm sure you've seen this report, but it's interesting that it was picked up by this leading mining engineer blogger, Jack Caldwell. I'm subscribed to his blog because of my involvement with Bristol Bay.

## New post on I THINK MINING

### [Rosemont Copper Report from TetraTech](#)

by [Jack Caldwell](#)

Late Saturday and I am browsing the internet. Here is an [amazing report](#) that I chanced on.

It deals with the Rosemont copper project to-be in Arizona. It is called the *Infiltration, Seepage, Fate and Transport Modeling Report*.

It is more than 400 pages long, so download it and read it, and wonder at the cost to produce. Should we be doing this for all mines?
